

MPHM-002

The Miko Pipe-Holding Magnet is a strong and versatile tool, designed to attach to pipes with a diameter ranging from 8" to 42".

The magnetic component consists of neodymium which is coated with epoxy to improve its corrosion resistance in sea water. With a holding force of 150 kg, the magnet can be used for fastening diving equipment, guide wires or anchor points for divers to pipes or other cylindrical steel structures.

The magnet is equipped with a mooring lug and breaking lever for easy release and safe operation.

All Miko magnets are shipped in a double-skin steel box to isolate the magnetic field and to prepare them for air freight.

Read "IMPORTANT NOTES ABOUT MIKO MAGNETS" enclosed in each box before use.

SPECIFICATIONS

HOLDING FORCE

150 KG

FOOTPRINT (FLAT)

188 X 120 MM

PIPE DIAMETER

CAPACITY

8" - 42"

NET WEIGHT

5 KG

GROSS WEIGHT (BOX)

12 KG

QUANTITY IN BOX

1 PCS

The stated holding force refers to the perpendicular holding force when applied directly onto a clean mild steel pipe of minimum wall thickness 10 mm.
