

MAM-005

MAM-005 has a holding force of 1 000 kg and can be used for heavy duty applications such as fastening oil booms, fenders or temporary mooring to ship sides and other steel structures.

The Miko Anchor Magnets form a series of powerful and robust underwater fixing points. With holding forces ranging from 90 kg to 2 000 kg, these magnets are used worldwide for a wide range of applications.

The magnetic component consists of neodymium which is coated with nickel to improve its corrosion resistance in sea water. The magnet is equipped with a breaking lever for easy release and safe operation.

All Miko magnets are shipped in a double-skin steel box to isolate the magnetic field and to prepare them for air freight. MAM-005 is also shipped with a keeper disk for further shielding.

Read "IMPORTANT NOTES ABOUT MIKO MAGNETS" enclosed in each box before use.

SPECIFICATIONS

HOLDING FORCE
1000 KG

FOOTPRINT
282 X 183 MM

NET WEIGHT
8 KG

GROSS WEIGHT (BOX)
21 KG

DEPTH RATING
FULL OCEAN DEPTH

QUANTITY IN BOX
1 PCS

The stated holding force refers to the perpendicular holding force when applied directly onto a clean mild steel plate of minimum thickness 30 mm.
