

MAM-LIGHT

MAM-Light is the most compact Miko Anchor Magnet, yet it has a holding force equivalent to the weight of an adult man. Thanks to its handy size and minimal weight, this magnet is a basic necessity for any diver in any situation.

The Miko Anchor Magnets form a series of powerful and robust underwater fixing points. With holding forces ranging from 90 kg to 2 000 kg, these magnets are used worldwide for a wide range of applications.

The magnetic component consists of neodymium which is coated with nickel and epoxy to improve its corrosion resistance in sea water. The magnet is equipped with a breaking lever for easy release and safe operation.

All Miko magnets are shipped in a double-skin steel box to isolate the magnetic field and to prepare them for air freight.

Read "IMPORTANT NOTES ABOUT MIKO MAGNETS" enclosed in each box before use.

SPECIFICATIONS

HOLDING FORCE

90 KG

FOOTPRINT

150 X 50 MM

NET WEIGHT

1 KG

GROSS WEIGHT (BOX)

4 KG

DEPTH RATING

FULL OCEAN DEPTH

QUANTITY IN BOX

1 PCS

The stated holding force refers to the perpendicular holding force when applied directly onto a clean mild steel plate of minimum thickness 6 mm.
