

TANK SEALER KIT

The Tank Sealer Kit is a quick, easy and versatile first barrier against leakages on storage tanks.

The two Miko Plasters® included in the kit are fitted with a neoprene sheet in the centre and magnetic nitrile rubber along the edges. The magnetic rubber will adhere to the steel surface of the tank while the soft neoprene centre will seal against the damage.

External anchor magnets (MAM-003 and MAM-Light) are applied to the outside of the neoprene centre to compress the plaster against the damaged area and limit the leakage. The equipment can be used both above and below the waterline.

The kit is supplied in an IP54-rated storage and transport case.

Contents

1 pcs	75 × 75 cm Neoprene Miko Plaster®
1 pcs	75 × 105 cm Neoprene Miko Plaster®
2 pcs	MAM-003 Miko Anchor Magnets
4 pcs	MAM-Light Miko Anchor Magnets

GROSS WEIGHT

56 KG

TRANSPORT CASE DIMENSIONS

79 X 53 X 45 CM

INSTALLATION PRINCIPLE

The Neoprene Miko Plaster® is applied to the damaged area, while directing the spray away from the user. One MAM-003 Miko Anchor Magnet is placed in the centre of the plaster to strangle the leak. The magnet can be re-positioned to further reduce the leak further.

The kit includes two MAM-003 and four MAM-Light that are used to achieve a sufficient seal.
